PROFESSIONAL SUMMARY

Construction Project Manager with deep expertise delivering large-scale infrastructure programs under public-private partnership (PPP) frameworks across the northeastern U.S. Specializes in high-power electrical grid upgrades, EV charging infrastructure, and full-cycle commercial site construction, with a track record of managing multi-hundred-million-dollar programs across government-regulated, multi-state environments. Columbia University-educated. Experienced leading 30+ subcontractors across concurrent active deployments.

PROFESSIONAL EXPERIENCE

Construction Project Manager | *Applegreen (multinational energy and convenience retail operator, 550+ locations across USA, UK & Ireland)* April 2025 - Present

- Manage full lifecycle execution of multi-state public-private partnership contracts (government-funded infrastructure built, financed, and operated by private entities) as part of a \$1B+ capital investment program, overseeing \$200M+ in active site construction value across EV charging infrastructure, high-voltage utility grid upgrades, and full-build retail travel center construction
- Oversee deployment of 400kW ultra-fast EV charging stations across 35+ active locations on major travel corridors including the NY State Thruway (27 service areas, \$450M redevelopment) and the full NJ Turnpike and Garden State Parkway EV coverage program. Maintaining 100% on-schedule delivery across concurrent state contract milestones
- Coordinate high-voltage electrical infrastructure upgrades with state utility authorities to deliver multi-megawatt grid capacity, managing utility scoping, load studies, and interconnection approvals from design through energization
- Direct 30+ subcontractors simultaneously across active sites. Support procurement including RFP coordination, bid evaluation, and scope negotiation for multi-state contracts, ensuring award alignment with program budget and timeline
- Manage end-to-end permitting across municipal, utility, electrical, and inspection domains within multiple state regulatory jurisdictions, maintaining zero permit-related schedule delays
- Serve as primary owner's representative in all government agency coordination, state authority liaison, and PPP compliance oversight

Project Coordinator | *FRAM+Slokker (award-winning mixed-use developer. Brightwater is one of Canada's largest master-planned communities)* 2023 - 2025

- Coordinated full construction lifecycle across all phases of Brightwater, a ~\$3B USD master-planned waterfront community comprising 2,500+ condominium units, 400+ townhomes, and 300,000+ sq ft of retail, restaurant, and commercial space. All phases delivered on schedule through to resident occupancy
- Tracked \$150M+ in phase-dedicated construction budgets across concurrent active phases. Managed 25+ subcontractors simultaneously, maintaining schedule compliance from initial mobilization through final turnover
- Maintained zero lost-time incidents across all active construction phases through rigorous safety protocol enforcement, subcontractor safety compliance audits, and daily site safety oversight
- Supported subcontractor procurement including bid package preparation, scope review, leveling, and award coordination across 25+ active trade contracts
- Processed 400+ RFIs and submittals, coordinating responses across architectural, structural, MEP, and civil consultant teams
- Led full permitting portfolio including municipal/zoning approvals, building permits, environmental assessments, utility coordination, and occupancy inspections with regional regulatory authorities
- Represented owner's interests throughout entire project lifecycle. On-site from groundbreaking through final occupancy and turnover

EDUCATION

Post-Graduate Certificate, Construction Project Management | *Columbia University*
Engineering Division

Graduate Certificate, Construction Management | *George Brown College*
Angelo DelZotto School of Construction Management

Undergraduate Degree, Building Technology | *George Brown College*

CERTIFICATIONS

OSHA 30-Hour Construction Safety Certification

TECHNICAL SKILLS & CORE COMPETENCIES

Project Management Software: Procore, MS Project, Primavera P6, Bluebeam, MS Office Suite

Design & Engineering Tools: AutoCAD (reading & markup), BIM/Revit (reading), CAD drawing interpretation

Infrastructure Expertise: High-power electrical grid coordination, EV charging infrastructure, PPP contract management, utility authority liaison

Construction Management: Multi-trade coordination, RFI/submittal management, budget & schedule control, multi-state permitting, owner's representation

Soft Skills: Government & agency relations, cross-functional team leadership, stakeholder management, owner's representative functions
