PROFESSIONAL SUMMARY

Owner-side Construction Project Manager with ownership-level accountability across large-scale mixed-use development and multi-state infrastructure programs totaling \$4B+ in combined value. Experienced across the full project lifecycle, from driving owner design reviews and tenant coordination through subcontractor procurement, budget ownership, and occupancy. Columbia University-educated. Delivers results through proactive risk escalation, disciplined trade management, and direct accountability for schedule, budget, and safety outcomes on every project.

PROFESSIONAL EXPERIENCE

Construction Project Manager | Applegreen

April 2025 - Present

Multinational energy and convenience retail operator, Blackstone Infrastructure Partners portfolio · 550+ locations across USA, UK & Ireland

- Own end-to-end delivery of \$200M+ in active site construction value across 80+ service areas as part of a \$1B+ Blackstone-backed capital investment program, directly accountable to ownership for schedule, budget, quality, and safety outcomes across PPP contracts with 6 state highway authorities including NY State Thruway (27 areas), NJ Turnpike Authority (21 areas), PA Turnpike Commission (17 areas), and additional state systems
- Manage design-build delivery across multiple PPP contract sites under a Blackstone Infrastructure Partners-backed investment structure, coordinating integrated design and construction phases, reviewing design submittals for constructability, and managing design-build trade contractors accountable for both engineering and field execution
- Drive 30+ subcontractors to program deadlines across concurrent active sites. Own RFP coordination, bid evaluation, and scope negotiation for all multi-state trade contracts, accountable for award decisions aligned with program budget and timeline
- Own end-to-end permitting outcomes across municipal, utility, electrical, and inspection domains in multiple state jurisdictions, maintaining zero permit-related delays through proactive agency coordination and early application strategy
- Manage full-build retail travel-center construction across 35+ active locations, overseeing site work, foundations, structural steel, MEP, and interior finishing from permit through certificate of occupancy
- Run multi-trade field coordination across civil, structural, mechanical, electrical, and plumbing scopes, sequencing concurrent active sites to protect schedule, quality, and safety
- Review design and shop-drawing submittals for constructability with the design team, resolving conflicts before field execution to control change exposure
- Drive inspections, punch, acceptance testing, and commissioning for each site, coordinating trades, agencies, and vendors through to turnover and certificate of occupancy
- Lead OAC and weekly trade coordination meetings, driving RFI and submittal turnaround, material lead-time management, and recovery planning across the program
- Serve as sole owner's representative in all state authority, government agency, and PPP compliance interactions across the program

Project Coordinator | FRAM+Slokker

2023 - 2025

award-winning mixed-use developer. Brightwater is one of North America's landmark master-planned communities

- Served as primary execution lead for senior PM across all active phases of a ~\$3B USD master-planned waterfront development on a remediated former industrial site, with direct accountability for subcontractor performance, RFI resolution, budget tracking, and permitting outcomes across residential, retail, and commercial construction
- Drove owner design review process across SD, DD, and CD phases, coordinating architect and MEP consultant responses to owner comments, tracking design changes against budget and constructability requirements, and ensuring procurement-ready documents on schedule
- Managed landlord work coordination for 300,000+ sq ft of retail and commercial tenant spaces, tracking base-building delivery milestones, sequencing tenant fit-out starts within active construction, and managing shell space handoffs aligned with lease commencement dates

- Owned accountability for \$150M+ in phase-dedicated construction budgets across concurrent active phases. Collaborated with development and finance teams on monthly budget reconciliation, tracking construction costs against the pro forma and providing cost analysis for ownership and investor reporting
- Prepared and delivered monthly construction progress reports to the owner and investment committee, providing schedule status, risk assessments, and recovery plan recommendations that informed project-level development decisions
- Drove subcontractor procurement across 25+ active trade contracts spanning structural, mechanical, electrical, plumbing, envelope, and finishing scopes. Managed 25+ subcontractors simultaneously from mobilization through final turnover
- Managed change order process on behalf of the owner, evaluating GC proposals for merit, negotiating scope and pricing, and tracking approved changes against phase budgets. Identified constructability conflicts during design reviews that reduced post-construction change exposure
- Took direct ownership of subcontractor safety compliance through weekly toolbox talks, safety plan reviews, and site audit protocols, maintaining zero lost-time incidents across all active phases
- Coordinated environmental compliance for development on a remediated former industrial waterfront site, overseeing stormwater controls, erosion and sediment measures, and regulatory reporting. Oversaw delivery of 18+ acres of public park and open space
- Processed 400+ RFIs and submittals. Led full permitting portfolio including municipal/zoning, building permits, environmental assessments, utility coordination, and occupancy inspections with zero delays across any phase

EDUCATION

Post-Graduate Certificate, Construction Project Management | *Columbia University*
Engineering Division

Graduate Certificate, Construction Management | *George Brown College*
Angelo DelZotto School of Construction Management

Undergraduate Degree, Building Technology | *George Brown College*

CERTIFICATIONS

OSHA 30-Hour Construction Safety Certification

TECHNICAL SKILLS & CORE COMPETENCIES

Construction Management: Multi-trade coordination, RFI/submittal management, budget and schedule control, owner's representation, subcontractor procurement, commissioning and turnover

Permitting & Regulatory: Municipal/zoning, building permits, environmental assessments, utility coordination, occupancy inspections, multi-state regulatory compliance

Project Management Software: Procore, MS Project, Primavera P6, Bluebeam, MS Office Suite

Design & Engineering Tools: AutoCAD (reading & markup), BIM/Revit (reading), CAD drawing interpretation

Delivery & Closeout: Design-build coordination, OAC and stakeholder management, inspections and commissioning, turnover and closeout, PPP and government agency relations
